

1. Go to the dev and prod Storage accounts.
2. Click on Data Management on the left pane.
3. Click on Lifecycle Management.

4. Set to move from Hot to Cool after 30 days

Details Base blobs

A rule is made up of one or more conditions and actions that apply to the entire storage account. Optionally, specify that rules will apply to particular blobs by limiting with filters.

Rule name *

rebrickabledev

Rule scope *

☒ Apply rule to all blobs in your storage account

☐ Limit blobs with filters

Blob type *

☒ Block blobs

☐ Append blobs

Blob subtype *

☒ Base blobs

☐ Snapshots

☐ Versions

Lifecycle management uses your rules to automatically move blobs to cooler tiers or to delete them. If you create multiple rules, the associated actions must be implemented in tier order (from hot to cool storage, then archive, then deletion).

If Base blobs haven't been modified in 30 days

Then Move to cool storage
